

Our 30 years experience and innovation has enabled us to overcome many design and manufacturing problems associated with ceramic lined pipe and equipment and to ensure a 'guaranteed fit' every time. HMA Greenbank piping systems have become the industry 'benchmark' due to superior product.

HMA Greenbank has become the 'benchmark' in this industry and are proud to provide a superior product.

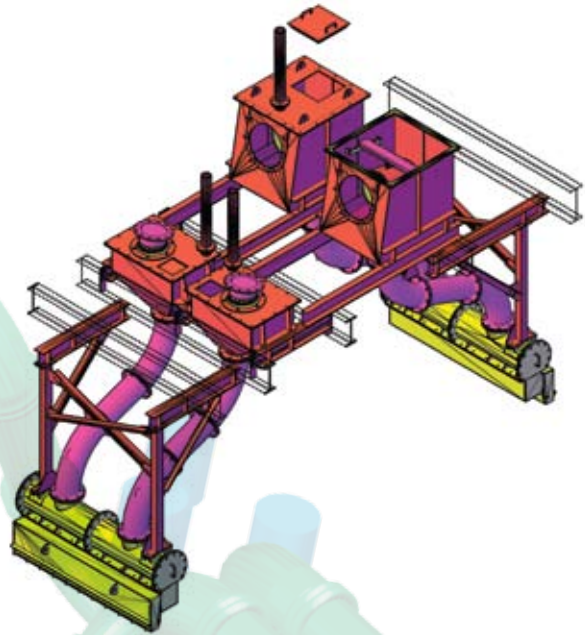

The manufacture of ceramic lined pipe and equipment is a specialised process and HMA Greenbank has developed a unique in-house manufacturing and quality control system to ensure consistency and a high standard at all times.

HMA Greenbank provide a variety of pipe linings ranging from Basalt, WearTech, Alumina, Eucor, ABSC Alumax and Sitech and have international associates allowing access to all ceramic linings commercially available.
